

OxyArm & OxyChin Test

Please complete the test and forward to your Supervisor.

* Your Name:

* Hospital, Clinic, Company:

Department:

* Employee ID:

* Supervisor's e-mail:

1. What FiO₂ range can OxyMask and OxyKid deliver?

24% - 50%

24% - 90%

40% - 70%

60% - 80%

* 2. At what flow rate can OxyArm/OxyChin achieve it's highest FiO₂?

10 LPM

15 LPM

20 LPM

40 LPM

* 3. Name a clinical advantage of OxyArm.

The open system is less claustrophobic & well tolerated

FiO₂ Titration is simple by adjusting the flow meter up or down

Relief from nasal irritation

All the above

* 4. How do you titrate O₂ concentration on the OxyMask, OxyKid and OxyTyke?

Replace the colored Venturi Jets to the specific FiO₂ required

Adjust Flow Rate up or down to maintain required SpO₂

You can't. You must change to another mask.
