

BetterShield™

3D Contoured Face Shields

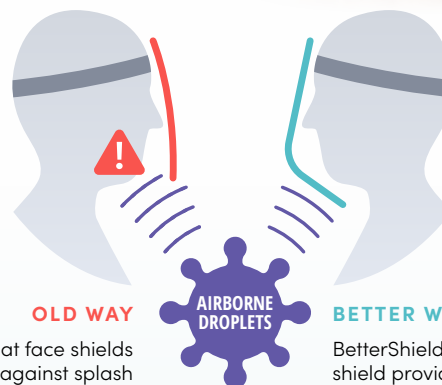

A Better Way to Protect Healthcare Teams

Unlike traditional flat shields, BetterShield offers full-face coverage—including under the chin and along the sides—where exposure risks are often overlooked.

With distortion-free optics and a secure, comfortable fit, BetterShield protects your team without compromising clarity or compatibility with eyewear and face mask.

Why Choose BetterShield?

- 3D Contoured Design
- Proven Protection in Real-World Settings
- Clinically Tested
- Anti-Fog Applied, Distortion-Free Optics
- Safe & Comfortable Materials
- Made Without BPA or Latex

OLD WAY
Traditional flat face shields don't protect against splash or airborne droplets*

BETTER WAY
BetterShield's 3D contoured face shield provides superior protection, wrapping under the chin and around the face

Committed to Safer Materials—For People and the Planet

BetterShield is packaged in recyclable HDPE "rhino bags," eliminating the need for coated, non-recyclable boxes. Our updated white corrugate cases are produced using elemental chlorine-free (ECF) bleaching methods—recognized as best available technology by the U.S. EPA and the European Commission—significantly reducing the formation of dioxins and persistent organic pollutants (POPs).

Ordering Information

PRODUCT CODE	SHIELD SIZE (IN)	SECURING MECHANISM	UOM
MXFS-100	8.25 x 9.5 x .01 in	Adjustable Elastic	100/bx
MXFS-40-FOAM**	8.25 x 9.5 x .01 in	Adjustable Elastic	40/bx

**Foam headrest for enhanced comfort.
