

Blades & Scalpels

Finding a better way
in surgical precision and safety

Enhancing Precision. Elevating Safety.

At Southmedic, precision and safety come first.

Our polymer-coated blades and Precision Plus Safety Scalpels (PPSS) are engineered to deliver smoother cuts, reduce tissue trauma, and help protect surgical teams from accidental cuts and punctures. For more than 40 years, we've been designing and manufacturing innovative solutions trusted by surgeons and healthcare professionals worldwide.

From advanced blade coatings to proprietary safety mechanisms, our products are built to support clinicians with tools that inspire confidence in every procedure.

- Sharper, smoother cutting edges
- Designed to reduce tissue drag and trauma
- Precision Plus Safety Scalpels (PPSS) with an intuitive safety mechanism
- Disposable safety systems to prevent accidental cuts during hand-off
- Sterile and non-sterile options across a wide range of blade sizes

Polymer-Coated Blades

Sharper. Smoother. Safer.

Our unique polymer-coated blades are designed to glide with clean precision for less tissue trauma. Unlike regular surgical blades, Southmedic blades reduce drag — giving surgeons greater control and a smoother experience.

It's the kind of difference a surgeon can feel.

Polymer Coated Surgical Blade

Even cutting edge

Smooth, clean cut is illustrated by cutting through 10 mm polystyrene (magnified 750 times). Our precision grinding technology coupled with our advanced polymer coating process, provides a significantly improved cutting edge.

Regular Surgical Blade

Irregular cutting edge

A regular surgical blade leaves a ragged edge as indicated by a lack of uniform smoothness when cutting the polystyrene.

Polymer-Coated Blades

BLADE	PART ID	PACKING
10 	73-0410	300 Blades, 6 Boxes of 50
11 	73-0411	300 Blades, 6 Boxes of 50
15 	73-0415	300 Blades, 6 Boxes of 50
20 	73-0420	300 Blades, 6 Boxes of 50
21 	73-0421	300 Blades, 6 Boxes of 50
22 	73-0422	300 Blades, 6 Boxes of 50
23 	73-0323	50 Blades/Box

Dermaplaning Blades

BLADE	PART ID	PACKING
10R 	73-0410R-50	50 Blades/Box

The polymer-coated 10R blade delivers precise, non-invasive exfoliation ideal for delicate dermaplaning procedures. Each sterile stainless-steel blade is designed to glide confidently across the skin, effectively removing vellus hair and surface debris for a smoother, more even finish. Often referred to as a butter blade, the 10R may also be used for controlled skin resurfacing.

Sterile Stainless Blades & Disposable Scalpels

Trusted Reliability

Southmedic's sterile and non-sterile stainless-steel blades deliver dependable performance with consistent sharpness and strength. Our disposable scalpels provide the same trusted quality and are available in a variety of surgical blade sizes. Designed for both right- and left-handed use, each scalpel features a dual-sided depth indicator for improved control.

Consistent Sharpness

Reliable performance every time

Wide Range

Available in multiple surgical sizes

Durable Stainless Steel

Strength for demanding procedures

Scalpels

Precision Plus Safety Scalpels (PPSS)

Precision Meets Protection

Southmedic's Precision Plus Safety Scalpels (PPSS) combine sharp performance with advanced safety features. Featuring a bright orange handle for easy identification and a retractable guard, these scalpels are designed to protect both patients and surgical teams.

Bright Orange Handle

Easy identification in the OR

Polymer-Coated Blade

The sharpest, smoothest cut available

Advanced Retractable Guard

Locks securely for safe disposal

One-Handed Activation

Suitable for right- and left-handed use

Lock Indicator Line

Confirms blade is safely secured

Precision Plus Safety Scalpels

Disposable Safety Scalpels and SPSS

Closed Safety, Open Confidence

Reduce the risk of accidental injuries with the first truly closed disposable safety scalpel system. Southmedic's SPSS Disposable Scalpels feature a polymer-coated blade for smoother cuts and a unique safety tab for protection.

Polymer-Coated Surgical Blade

Regarded as the sharpest, smoothest edge available

Easy Loading & Disposable Cartridge

Safe, simple use and disposal

Safety Tab for Optimum Protection

Guards against accidental injury during installation

Clear Plastic Sheath

Complete visibility with thumb rest for ease of use

SPSS Metal Handle Safety Scalpels

Reusable Safety with Familiar Feel

The SPSS Metal Handle Safety Scalpel combines the weight and balance of a traditional scalpel with Southmedic's innovative safety cartridge system.

Polymer-Coated Surgical Blade

Smooth, sharp precision with less tissue trauma

Reusable Handle

Cost-effective and reduces waste

Metal Handle

Same weight and feel as a conventional scalpel

Customized Ruler

Designed into the reverse of the handle

Clear Plastic Sheath

Visibility and safety during use
